I've posted more than 6,400 times to my blog since starting 2002. Almost all of the posts have one or more tags (see attached). What, if anything, does this tag cloud tell you about me

Your tag cloud, drawn from over 6,400 blog posts since 2002, provides a revealing snapshot of your interests, recurring themes, and even aspects of your personality and life journey. Here's what your tag cloud tells us about you:

Major Themes and Interests

1. Media, Technology, and Communication

- Tags like *Radio* (340), *YouTube (Mine)* (169), *Apple* (133), *iPhone* (135), *movies* (127), *television* (131), *Google* (149), *Twitter* (88), and *WordPress* (15) suggest a deep and sustained engagement with media, technology, and digital communication.
- Frequent references to *audio* (71), *podcasts*, and specific tech products (e.g., *AirPods*, *MacBook*, *iPad*) reinforce your interest in both the tools and the culture of modern media.

2. Personalities and Thought Leaders

- Names like *Scott Adams* (122), *Mark Ramsey* (58), *William Gibson* (63), *Seth Godin* (75), *Yuval Noah Harari* (20), *Bruce Sterling* (17), and *Alan Watts* (14) appear often. This indicates you follow and reflect on the ideas of influential thinkers, especially those in media, technology, philosophy, and futurism.

3. Philosophy, Consciousness, and Self-Reflection

- Tags such as *consciousness* (111), *Buddhism* (51), *ego* (28), *awareness* (40), *zen* (29), *nonduality* (9), *meditation* (48), *self* (78), *universe* (52), and *god* (56) show a sustained interest in philosophical, spiritual, and existential topics.
- The presence of *death* (23), *immortality* (9), and *free will* (13) further suggests you explore deep questions about existence and the human condition.

4. Personal Life, Locality, and Relationships

- *Kennett* (199), *Jefferson City* (37), *Coffee Zone* (46), *Prairie Garden Trust* (24), and various personal names (e.g., *Hattie* (45), *Riley* (62), *Sheryl Crow* (62)) indicate a strong sense of place and personal connection. These tags suggest you write about your community, family, friends, and personal experiences.
- Tags like *memory* (32), *high school* (11), and *jobs* (25) point to autobiographical reflection.

5. Humor, Creativity, and Culture

- *Humor* (140), *funny songs* (21), *animation* (13), *Bad Lip Reading* (14), and *poetry* (19) highlight a playful, creative side and an appreciation for the lighter aspects of culture.

6. Current Events and Social Commentary

- Tags such as *COVID-19* (66), *Trump* (88), *Obama* (83), *Iraq* (43), *newspapers* (101), and *sports* (66) show engagement with news, politics, and societal issues.

What the Tag Cloud Reveals About You

- **Breadth and Depth:** Your tag cloud is unusually broad, spanning technology, philosophy, personal life, humor, and current events. This breadth suggests curiosity, intellectual engagement, and a willingness to explore diverse topics.

- **Reflective and Analytical:** The prominence of philosophical and self-reflective tags implies you use your blog as a space for personal exploration and meaning-making.

- **Community-Oriented:** Frequent tags about places and people indicate you value relationships and community, documenting local events and personal connections.

- **Media Savvy:** Your consistent focus on media, technology, and digital culture points to a professional or passionate interest in these fields—possibly as a media creator, commentator, or enthusiast.

- **Playful and Open-Minded:** The mix of humor, pop culture, and serious topics suggests a balanced, open-minded approach to life and writing.

What Tag Clouds Can (and Can't) Tell

Tag clouds are a powerful tool for summarizing the main topics and interests of a blog or individual. They visually highlight what you return to most often, making them useful for self-reflection and for others to quickly grasp your focus areas[1] [2] [3]. However, as some sources note, they emphasize the most frequent topics and may underrepresent less common but significant interests[1] [4]. The context and nuance of how you write about each topic are not captured—only the frequency.

> "A tag cloud showing one's own tags can be evocative, as a good summary of what one is reading and thinking about, and useful for personal self-reflection... useful for showing other people what one is thinking about."[1]

In Summary

Your tag cloud paints a picture of someone who is:

- Deeply engaged with technology, media, and communication
- Reflective, philosophical, and interested in consciousness and meaning
- Connected to place, people, and personal history
- Playful and creative, with a strong sense of humor
- Attuned to current events and societal trends

It's a dynamic, multifaceted portrait—one that reflects both your intellectual pursuits and your personal journey over more than two decades of blogging.
